Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Appeal

1. In light of applicant's persuasive arguments presented in the Appeal Brief filed February 2, 2004, the rejections of claims 1-5 over EP 784 114 issued to Huth et al. are hereby withdrawn. However, new grounds of rejection are presented below.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 3 is rejected under 35 USC 102(b) as being anticipated by US 3,922,455 issued to Brumlik.

Brumlik teaches linear elements (i.e., fibers) having “nibs” around the circumference (abstract and figure). The nibs may be scales, fibrils, piles, globules, or similar projecting or protruding elements (i.e., disturbances) (col. 2, lines 60-65). Thus, claim 3 is anticipated.

4. Claim 4 is rejected under 35 USC 102(b) as being anticipated by US 4,520,058 issued to Okabe.

Figure 1B of Okabe shows pile fibers having fibrils extending from the side walls thereof. Additionally, fibrils extending from the fiber end can be seen on the far right fiber of the figure. Thus, claim 4 is anticipated.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 5 is rejected under 35 USC 103(a) as being obvious over the cited Okabe reference.

Although Okabe does not explicitly teach a lubricant on the pile fibers, lubricants are well known in the art of textile manufacture. Applicant is hereby given Official Notice that lubricants are commonly employed during the fabric forming process and as a finish for said fabric. Thus, it would have been obvious to one skilled in the art to employ a lubricant on the fabric taught by Okabe.

Allowable Subject Matter

7. Claims 1 and 2 are allowed. The prior art does not teach or fairly suggest a fabric having pile fibers, wherein said pile fibers have surface abrasions on the fiber surface in an amount ranging from 2-90%, preferably 5-50% of the free length of the pile fiber. Thus, claims 1 and 2 are allowed.
